The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/526,566	Applicant(s) OSHIKIRI, MASAHIRO	
	Examiner PARAS SHAH	Art Unit 2626	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

C.

DETAILED ACTION

1. This communication is in response to the Arguments and Amendments filed on 06/20/2008. Claims, 3-8, 11, 21-31 are pending and have not been examined since upon further considerations as a result of the newly added claims multiple claimed inventions have been found. The Applicant is advised to elect a particular group for examination. Please see below.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 3-8, 11, 21-23, and 30-32 are drawn to the acoustic coding apparatus, classified in class 704, subclass 500.
- II. Claims 24, 26, and 28 are drawn to the transmission apparatus, classified in class 375 subclass 295.
- III. Claims 25, 27, and 29 are drawn to the reception apparatus, classified in class 375, subclass 316.

3. Inventions I, II, and III are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination is geared towards the acoustic coding and decoding of signals using a

base and enhancement layer, which holds benefits for devices capable of encoding and decoding for improving compression of acoustic signals in coding systems. The subcombination has separate utility for receiving information and transmitting information from devices or structures. The subcombinations deal with a receiver and transmitter, respectively, where the receiver and transmitter can use any type of acoustic coder or decoder which may be present in any type of system such as cell phones and mobile stations.

The examiner has required a restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

4. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction were not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to PARAS SHAH whose telephone number is (571)270-1650. The examiner can normally be reached on MON.-THURS. 7:00a.m.-4:00p.m. EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Edouard can be reached on (571)272-7603. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
